

# February 2011

Working with Megan and Jenny of Gija Total health to set up the new Warmun dental clinic for use on Monday 7<sup>th</sup> and Tuesday 8<sup>th</sup> February.

Most of the equipment was purchased through DentAid UK. They provide portable equipment and refurbish instruments etc for community work world wide

The kids below right were completely unfazed by their mum having an injection and extraction

# March 2011

The aftermath of the flood that devastated the Warmun Community on the 13<sup>th</sup> March.

Compared to other losses we consider ourselves very lucky, originally we thought this was the dental transportable on the right.

Bottom left photo; see the watermark on the back of the chair. Middle photo; not sure if dental carts survive a swim. Bottom right photo; it took a concerted effort to clean up the equipment and much stock was destroyed.
